

**Dear Valued Customer:**

**December 20, 2021**

This letter is to inform you that our records indicate you DID NOT receive any products included in the current recall of Fresh Express and private label products manufactured at our Streamwood facility from November 20 through December 16. No action is required by you.

The recall was necessitated due to a positive random sample test result for *Listeria* conducted by the Michigan Department of Agriculture from an expired 9 oz. Fresh Express Sweet Hearts salad mix produced at Streamwood facility.

All production at the Streamwood plant was immediately stopped and a thorough sanitation review has been underway. We hope to restart production soon. In the meantime, to manage the temporary break in supply, we are drawing on the full Fresh Express network to meet customer needs.

We greatly appreciate your ongoing support.

Sincerely,

**Fresh Express Incorporated**
