

Peirone Announces a Major Expansion of Warehouse Capacity

April 3rd, 2018

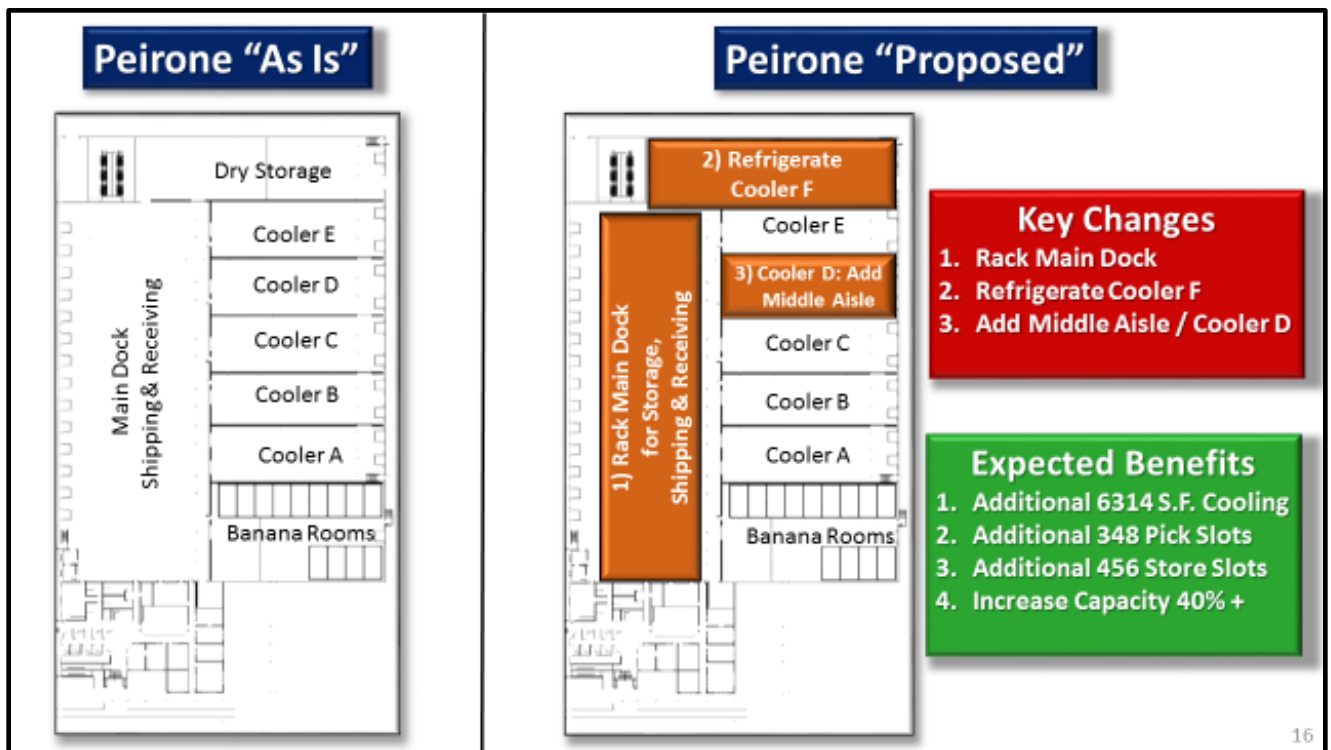

Thanks to all of our member support, the Peirone facility on Hallett Road in Spokane is rapidly approaching maximum capacity!

To ensure that product is always handled correctly and to allow Peirone further room for growth, the Peirone Board of Directors has unanimously approved a warehouse capacity expansion program.

This retrofit of the existing warehouse will add over 800 additional slots, giving Peirone approximately 40% additional capacity! Construction will start in about one month and is scheduled to be completed in late June.

Rest assured, careful consideration and planning have been taken to ensure that Peirone's ability to handle customers' needs will not be adversely affected during construction.

Illustrated below are a before-and-after look at the expansion project:

Many thanks to all of our members for your wonderful support.

We would not be where we are today without you!
